

DATASHEET

Single Sign-On

100% Cloud

ENTERPRISE READY

- 10 Global Data Centers
- 24x7 Global NOC
- Near Zero Latency
- SIEM Integration

EASY TO DEPLOY

- 100% Cloud-based
- No Onsite Hardware
- Deploys in Less Than a Day
- Web 2.0 Admin Interface

FLEXIBLE PURCHASING

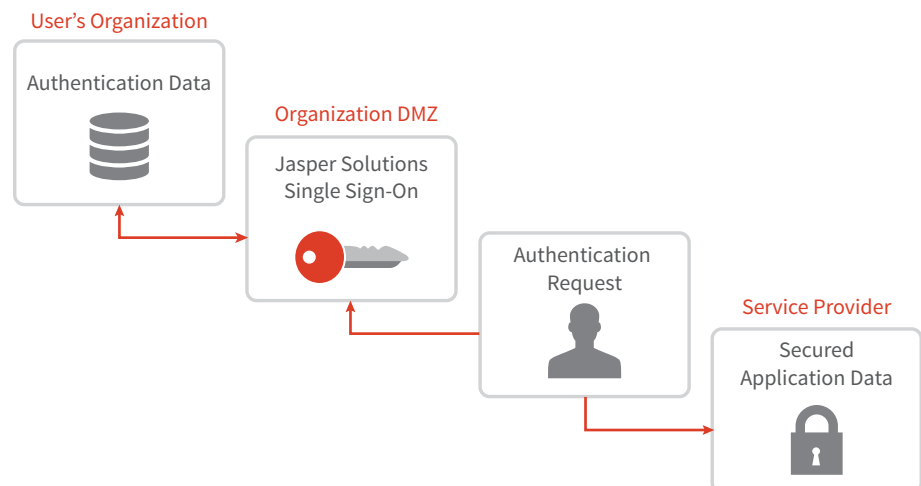

- Upfront Pricing
- No Hidden Fees
- No Long Term Contract
- Monthly Payment Options

Business Case for Single Sign-On

Jasper Solutions Single Sign-On provides authentication services for users and securely provides appropriate data to requesting services. Jasper Solutions Single Sign-On can provide a rich set of user-related data to applications instead of just a simple yes/no response to an authentication request. This data can help an application provide a more personalized user experience, save the user from having to manually enter data the service requires, and refresh the data each time the user logs onto the application.

KEY FEATURES

- Support for LDAP, Kerberos, web server and Servlet Container based authentication systems
- Support for reading user data from LDAP directories and relational databases (no special schemas required) and performing simple or complex transformations on the acquired data
- Support for releasing only selected data and making sure it gets there securely
- Excellent scaling - a single instance can handle millions of authentication requests per day

CLOUD INFRASTRUCTURE

- 24x7 Global NOC
- Global Load Balancing
- High-Speed Storage
- Near Zero Latency
- Real-Time System Status Portal
- REST API
- SIEM Integration

DATA CENTER LOCATIONS

- Atlanta, United States
- Dublin, Ireland
- Kansas City, United States
- Montreal, Canada
- Newark, United States
- San Jose, United States
- São Paulo, Brazil
- Singapore
- Sydney, Australia
- Tampa, United States
- Tokyo, Japan
- Washington DC, United States

HOW DOES IT WORK?

A user wants to access a SAML compliant application in your organization. Jasper Solutions Single Sign-On does the following:

- Accepts SAML authentication request sent from application Service Provider
- Authenticates the user against your organization's existing authentication service
- Jasper Solutions Single Sign-On collects user data from your organization's existing data stores
- Securely transmits the collected information to the application Service Provider
